Objective-C, Swift, Java, React Native, JavaScript, C#, C++, MVC, MVVC, CoreData, MySQL, SQLite, NoSQL (Realm, Firebase), BaaS (Parse, AWS, Azure), REST, JSON, Continuous Integration, Git, HTML, CSS, Cocos2D

Professional Experience

Senior Mobile Developer, 11/2012 to 06/2017 | Manao Software, Chiang Mai, Thailand
Key contributor to the fast growing company 's mobile projects. Serving in a client-facing role translating the business requirements to delivering viable, scalable and saleable solutions. Collaborating well with the engineering team in providing high quality development standards while delivering solutions on-time and on-budget.

- Developed, delivered and maintained a full mobile solution for AppMover (iOS | Android) - a content management platform for native mobile apps.

Mobile Developer (Freelancing based), 06/2017 to Present

- Developed, delivered and maintained Musea (iOS) and also its MVP version in Android - a native app that lets museums quickly build a custom app.
- Fixed bugs, maintained, delivered in various environments (staging, production) for Jetspace (iOS, Android) - a react native app of South Los Angeles High school to take students' engagement to a new level.
- Fixed bugs, designed and integrated a photo / video capturing feature for -isms (iOS) - a native social media app to share quotes and overhead lines with either everyone or just a few people.
- Fixed bugs, developed AutoMD (iOS, Android) - a project for U.S Auto Parts, integrated with in-house design and dev team to build mobile frontend for their API.
- Fixes bugs, developed a new authentication flow for Audiojack (iOS, Android) - a native streaming media content app.
- Fixes bugs for BlueSun (iOS, Android) - a native QR tracking app.
- Fixes bugs, integrated Stripe payment method for Thomson House Group (iOS) - a native app for THG's members.
- Forked and customized 3rd party libraries to meet the react-native projects' needs.
- Developed and integrated a photo / video capturing feature with filters like Instagram for a react-native app (**Client Confidential**).
- Developed a Snapchat's navigation-based iOS app (**Client Confidential**) with streaming video player feature enabled with user interactions during the playback.
- Developed a location-based app (**Client Confidential**) like Uber but for medical transportation services.
- Developed a native iOS app (**Client Confidential**) with sound recording and playback.

Education

Bachelor of Science (BSc) in Computer Information Systems (with honors), 3.43
Payap International College, Chiang Mai, Thailand
2008 - 2012
